

PROFESSIONAL SUMMARY:

Experienced DevOps and Cloud Engineer with expertise in automating infrastructure, building CI/CD pipelines, and optimizing cloud-based systems for scalability and performance. Proficient in AWS, Azure, containerization and configuration management. Strong background in software development, system administration, and Agile methodologies. Adept at fostering collaboration between development and operations team to deliver high-quality and reliable solutions.

Key Skills

<ul style="list-style-type: none">• Docker, Kubernetes	<ul style="list-style-type: none">• PostgreSQL, MongoDB, Firebase	<ul style="list-style-type: none">• AWS, Azure
<ul style="list-style-type: none">• Linux (Ubuntu, RedHat) and window Server	<ul style="list-style-type: none">• Jira, Confluence, Slack and Trello	<ul style="list-style-type: none">• Git, GitLab and GitHub
<ul style="list-style-type: none">• Jenkins	<ul style="list-style-type: none">• Scrum, Kanban	<ul style="list-style-type: none">• Prometheus, Grafana and ELK Slack
<ul style="list-style-type: none">• CI/CD Integration	<ul style="list-style-type: none">• Terraform, Cloudformation and Ansible	<ul style="list-style-type: none">• Python, Shell Scripting, Bash and Powershell

PROFESSIONAL EXPERIENCE:

Alumni Solutions Ltd

Cloud and DevOps Engineer

June 2023 – Present

- Designed, implemented, and Managed cloud infrastructure on AWS, improving application availability and scalability by 20%.
- Created and Maintained CI/CD pipelines using Jenkins, GitLab CI and Terraform for infrastructure provisioning and application deployment.
- Automated configuration management using Ansible and Gitaction, reducing manual intervention and deployment time by 40%.
- Led the migration of legacy applications to kubernetes on AWS EKS, resulting in a 50% reduction in resource consumption and improved container orchestration.
- Implemented monitoring solutions using Prometheus and Grafana, increasing incident response efficiency by 25%.
- Integrated logging systems using ELK Stack for enhanced observability and proactive issue detection across cloud environments.

DevOps Engineer

IBT Learning

Jan 2023- June 2023

- Developed and deployed containerized applications using Docker and Kubernetes, optimizing resources utilization and application delivery speed.
- Managed cloud infrastructure on Azure, automating the provisioning of virtual machines, networks, and storage via terraform and Azure CLI.

- Supported a Microservices architecture, ensuring seamless integration and deployment with a focus on automation and performance optimization.
- Collaborated with development teams to implement version control practices using Git and enforce automated testing and deployment pipelines.
- Implemented security best practices for cloud infrastructure, including IAM roles, multi-factor authentication (MFA), and encrypted storage.
- Delivered high-availability and disaster recovery solutions in the cloud, achieving a 99.9% uptime SLA.

Business Analyst/Systems Administrators

Kimberly-Clark Professionals

Irving, TX

- Translated stakeholder requirements into deliverables such as functional specifications, user stories, use case diagrams, workflow diagrams, data model diagrams, mock-ups, and activity diagrams.
- Collaborated with business owners to define scope, clarify functional and non-functional requirements, and translate them into feature requirements.
- Worked with business system users to understand and document existing and future state processes.
- Coordinated with project managers and stakeholders to ensure project success.
- Managed multiple projects simultaneously, ensuring timely delivery of milestones and adherence to budget constraints.
- Collaborated with cross-functional teams to gather and analyze business requirements, resulting in a 15% improvement in operational efficiency.
- Deployed and managed server infrastructure on AWS ensuring high uptime and scalability for critical applications.
- Automated system maintenance tasks and updates using Bash and python Scripts, reducing manual workload and errors.
- Created and optimized AWS Cloudformation templates for repeatable and efficient infrastructure provisioning.

EDUCATION

- **LL.B, Civil Law (WES Evaluated)**
Olabisi Onabanjo University 2005
- **LL.M, International Commercial Law (WES Evaluated)**
University of Aberdeen 2010
